

### REMARKS

Claims 1-13 are pending in the application.

Claims 1-13 are rejected under 35 U.S.C. § 112, second paragraph as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claims 14 and 15 have been newly added.

The subject matter of claim 1 is to provide first and second processors, wherein the former processes data in real time on the communication data stream, while the latter processes data in non-real time on the communication data stream. Further, the first processor renews parameters and transfers the data to be processed with the renewed parameters to the second processor, so that the second processor processes the transferred data as referring the renewed parameters.

The renewed parameters are described in applicant's specification for example page 8 (substitute spec page #).

The subject matter of claim 5 is similar to that of claim 1, but claim 5 is featured in that a plurality of first processors is arranged in series to pipeline-process.

In view of the remarks set forth above, this application is in condition for allowance which action is respectfully requested. However, if for any reason the Examiner should consider this application not to be in condition for allowance, the Examiner is respectfully requested to telephone the undersigned attorney at the number listed below prior to issuing a further Action.

Any fee due with this paper may be charged to Deposit Account No. 50-1290.

Respectfully submitted,

  
Brian S. Myers
